

# SMART HOME

**WELL-BEING**  
IN YOUR HOME

**GEWISS**

## New forms of well-being

Today, well-being is creating the home of your **dreams**. Safe, comfortable, sustainable, smart and connected. Gewiss' **Smart Home** interprets this concept of **well-being** with one small, but fundamental gesture: **listening**. By listening to the needs of each individual, we have created a notion of **well-being that is available and adapted to all**.

## Well-being that is informed and free

We have created a **system that moves with the times**, already open and prepared for the advancements that will come in the future. A system that is suitable for those with small-scale **restructuring** requirements, as well as those looking for **a broader renovation of their own spaces** and those who buy houses off plan and want to **design their well-being** in advance.

# Goodbye domotics , hello well-being

As a child, all you need to build a tree house is imagination. However, today we understand that there are **many nuances** involved in making your dream a reality. A different one for each of us. The same is true for well-being.

By considering a more free concept of well-being, we are also given more freedom in naming it. The words have changed, but most importantly, the approach has changed. **Smart Home is more attentive to people, a system that truly takes care of their well-being.**

Controlling and managing a property from your smartphone makes your everyday life more comfortable. It is from this simple yet revolutionary approach that our well-being solutions were born.

Discover our solutions and feel at home, at last:

Feeling protected	((O))
Feeling safe	🛡️
Feeling sustainable	🌱
Feeling happy	🎉
Feeling comfortable	🏠
Feeling welcomed	🔑

# Smart Gateway the beating heart of well-being

The **heart** of Gewiss' Smart Home is **Smart Gateway**, a device that uses the **cloud** and combines all the information that unites your home and the web. Smart Gateway operates at the core of your home, where different solutions work together alongside Gewiss: **third parties** such as voice assistants, Amazon Alexa and Google Assistant, or Sonos audio systems, which talk to each other and deliver well-being in every room.

The **Smart Gateway App** allows you to access all device functions in a simple and intuitive way, both at home and remotely from your smartphone. With modern graphics and intelligent controls, the Smart Gateway App delivers a more instant concept of well-being in your home.

# Thousands of solutions Infinite connections One heart

## Intelligence is connected

A combination of technologies that help to balance your energy saving, comfort and well-being needs, as well as simplifying your home life and ensuring the safety of those you live with. Smart Home helps you avoid waste and save on bills, but most importantly, makes your home welcoming, comfortable and convenient to live in.

## Well-being is feeling **protected**

Protect your home with bespoke, connected solutions that can be easily managed, from your smartphone or computer. Simple yet strong protection: for every requirement in any situation.

### Well-being is enjoying the moment

You are relaxing on the sofa with your family, after a hard day. Then, the door entry phone rings. Just one tap in the Smart Gateway App and you can see who is at the door. Just what you were missing: the pizza has arrived!

#True Safety Stories

## Feeling safe means living in harmony

GEWISS

## Well-being is feeling **safe**

Being happy at home means feeling safe, having control over your appliances, alarms and systems, both when at home and when you are away.

### Well-being is freeing up energy

You are enjoying half an hour of daily meditation. In the meantime, the tumble dryer and dishwasher are doing their jobs. Suddenly, a storm plunges you into darkness. No need to worry: Restart automatically turns the electrical system back on. If you want to be even safer, use the Smart Gateway App to check that your appliances have restarted.

#True Sustainability Stories

## *Feeling sustainable is to cultivate the future*

GEWISS

## Well-being means feeling sustainable

Sustainability is about personal well-being, but it also concerns the environment. Having devices that monitor household consumption and allow you to pollute less, is a true asset.

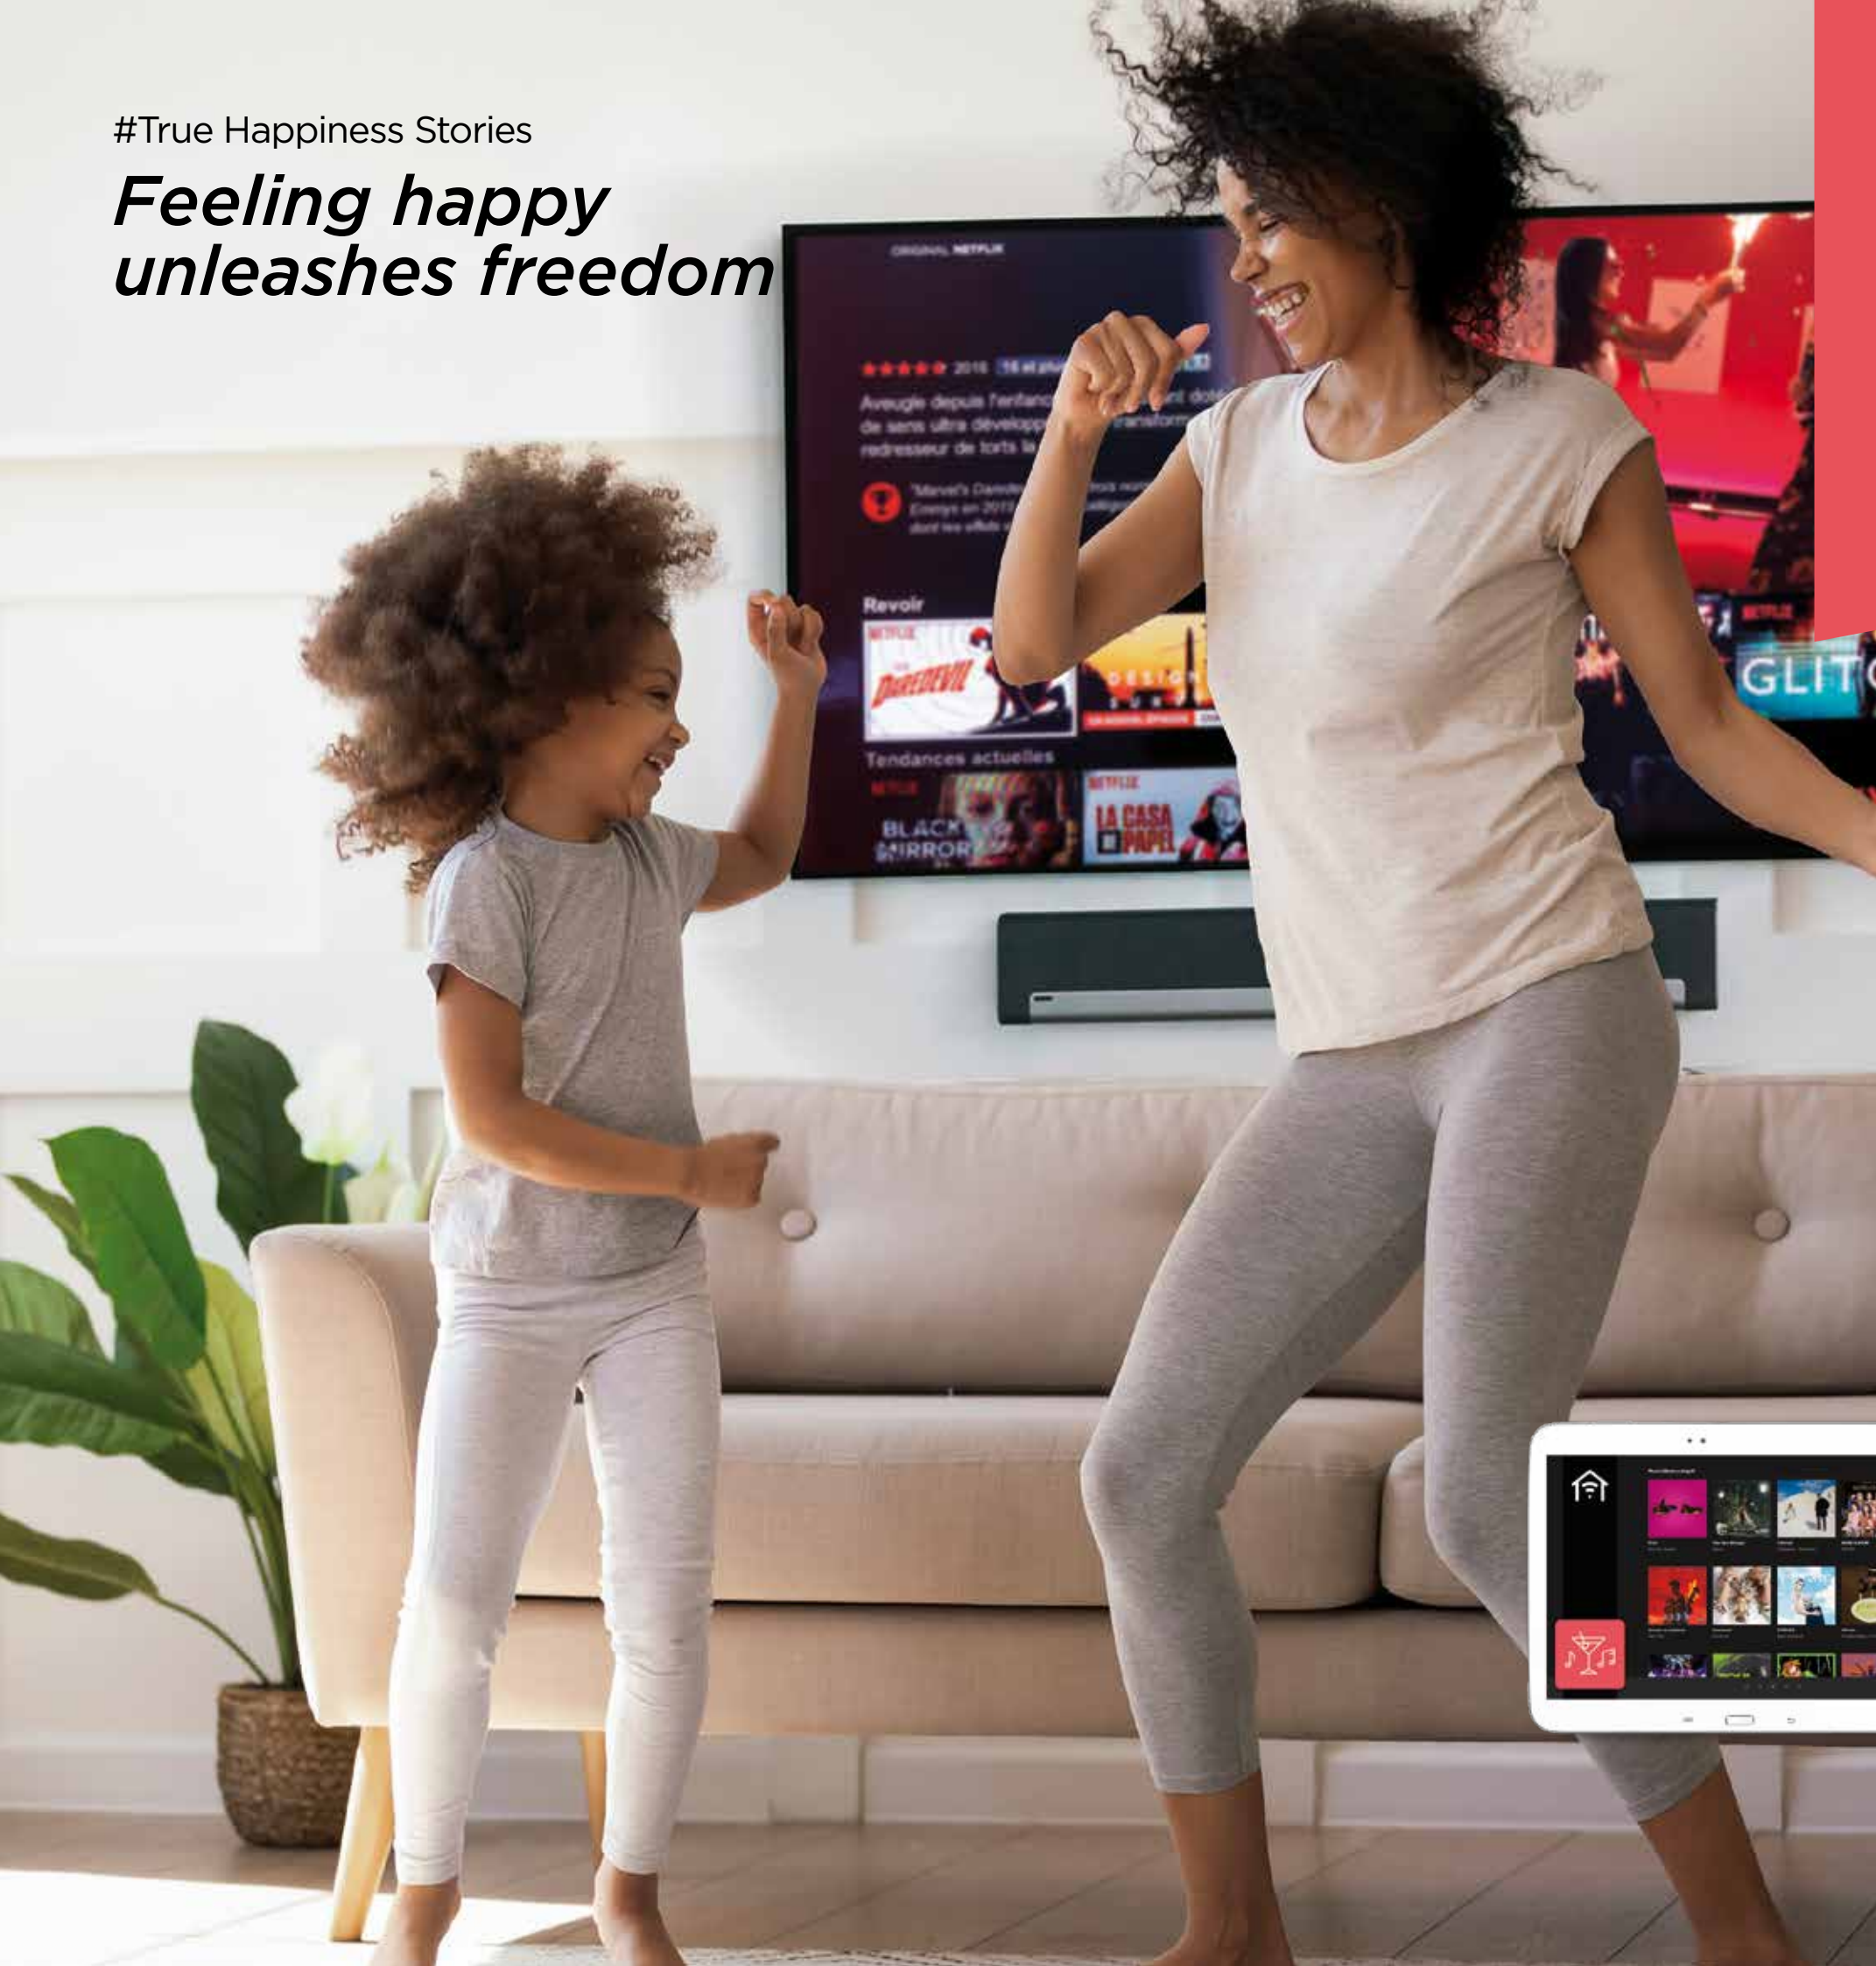

### Well-being is a priority

You have a green thumb and are busy taking care of your plants. Meanwhile, the oven is baking a cake and the washing machine is spinning. The system is using more power than expected and there is a risk that the meter will suddenly cut off the power. No problem: the home charging management system monitors the consumption of every appliance and will disconnect the non-essential ones. Dinner and laundry are saved!

#True Happiness Stories

## Feeling happy unleashes freedom

Entertainment

## Well-being is feeling **happy**

Today, you can manage your favourite scenarios, operate an audio system room by room, and play playlists from the internet or Spotify with a simple voice command.

### Well-being is about positive notes

Music and dance are two of your greatest passions. Let loose to the rhythm of your favourite bands and change songs with a simple voice command. Transitioning from rock to dance or changing the volume has never been easier. With this entertainment solution, your home is always listening to the right soundtrack.

planning

## Well-being is feeling comfortable

With one small gesture you can customise your spaces to suit your needs: lights, shutters, temperature. It's easy to choose scenarios based on what you want to do or how you want to live.

### Well-being is a relaxing setting

Sunday is the perfect occasion. No work obligations, a slower pace, a long hot bath, and perhaps a glance at the newspaper. Choose a light colour that fits with what you are doing. Every space and every moment can be enjoyed in the right shade.

Forced ventilation

## Well-being is feeling **welcomed**

Enjoying the ideal climate at home is easier than you think. Managing the heat and the cold is a breeze, and can even be done from your smartphone or computer.

### Well-being is sensitive

You finish work early and now you are back at home. The day was pretty cold and you are already looking forward to a warm and welcoming environment. The home system is still off, but the geolocation activated on your smartphone knows you are on your way home, and turns on the heating. Your return home will be pure comfort.

# Well-being today and tomorrow

The **Smart Home system reflects the present**. The system already offers different levels of well-being, from the most simple to the most articulated.

But the Smart Home system **also reflects the future**. It is prepared to embrace the solutions that will arrive in the next few years, and integrate new systems with a more **complete** and **customisable** focus on well-being. Smart Home is flexible and ready to accommodate the **future** of comfort and living well.

## The right representative for your well-being

Well-being is nuanced. We believe that to better meet all of these nuances, it is necessary to **rely on one representative** that focuses solely on this skill. We believe that a **certified installer** is the best solution for the well-being you desire.

**Contact us to locate your nearest installer.**
